Building permit is required.

(1)Fee based upon estimated cost of construction - new buildings or structures. Estimated cost of construction based by current building valuation data report of sq. ft. construction costs published by International Code Council (ICC.)

(2) When proposal involves reconstruction, alteration or alteration to an existing structure, permit fee shall be based upon half of cost of current building valuation for new construction and 20% for interior buildouts. Only the square footage of area involved shall be considered for fee purposes.

(3) Full cost of a UCC non-residential plan review shall be paid by permit applicant at time of building permit issuance. (4) After estimated cost of construction has been ascertained in the manner outlined above, building permit fee shall be assessed in accordance with the following formula: Residential: All new construction and alterations including

accessory uses unless otherwise listed with the fee schedule. Initial fee \$25.00+gross area x construction type square footage costs - type of construction factor x permit fee multiplier = permit fee.

Commercial – All new construction and alterations. Initial fee \$35.00 + gross area x construction costs type of construction factor x permit fee multiplier = permit fee.

Permit Formulas: Permit fee multiplier = 0.0065 construction type square footage costs - type of construction factor see Table 1.

Occupancy permit:

Occupancy permit:	
Residential (included in building permit fee)	\$0.00
Commercial:	50.00
Demolition permits:	25.00
Mobile homes: Replacement of a unit on existin	ng previously
prepared and approved site within a mobile hor	me park:
:	\$50.00/unit.
Location of unit on new site or single lot outside	e of mobile
home parks (see building permits).	
Including occupancy permit:	
Curimming pooler Above ground	¢05.00

Swimming pools:	Abo	ve ground	\$25.00
	In g	round	50.00
Sheds under 200	sq. ft.:		25.00
Fence:			25.00
